\$5.00

A 50 Ft. HEDGE

We grow large quantities of hardy shrubs that are admirably adapted for this purpose, and will be pleased to quote prices or reply to inquiries regarding same. A hedge not only will add much to the attractiveness of property, but may be useful as a screen, wind-break or division. Many shrubs require little or no attention to keep them in the desired form, while others must be sheared. If you will tell us the length; height desired to keep same at; location or position, and class (evergreen, foliage or flowering), we will cheerfully suggest what we think would please you best. Plant most sorts about two feet apart.

FOR BEST RESULTS with the sand cherry hybrids (Compass, Sapa, Opata, Cheresota, Sansota, Wachampa), plant one-year-old or small trees. By cutting these back they will branch from the ground. Where grown in bush form some of the oldest wood can be cut out each season and a vigorous growth kept up, which will result in more and finer fruit.
